

# *PROCLOUD CLASSROOM MANAGEMENT*

## **Putting Teachers in Control of the Classroom Digital Learning Experience**

The jump to digital learning has fundamentally transformed schools and their classroom instruction. Students now have a wealth of information at their fingertips, whether it is through laptops, Chromebooks, iPads or any other mobile devices. The end goal is to modernize classroom environments, improve student achievement, empower teachers and maximize course curriculum.

**The question is how to go from the dream of digital learning to the realization of this transformation at your school? How do instructors ensure that the technology investment is maximized with students staying on task and remaining engaged in the lesson?**

# CLASSROOM MANAGEMENT

---

## ***THE SOLUTION— PROCLOUD CLASSROOM MANAGEMENT***

Teachers are looking for ways to better engage students in the classroom. The days of writing on the blackboard are a thing of the past, and even today's smart boards do not provide the type of control and two-way communication needed to enhance learning. ADTRAN's ProCloud Classroom Management solution is quick, economical and requires zero IT staff resources – teachers are in complete control of their classroom's experience.

ProCloud Classroom Management makes the grade by supporting teachers and trainers with a wealth of dedicated assessment, monitoring, collaboration and control features to unlock the power of technology in the classroom

- **Control:** Allows teachers to control student activity on each device in the classroom
- **Monitor Internet Access, Applications and Resource Usage:** Monitor what students do, control when they can do it and prevent access to resources whenever required.

- **Assess:** Unique Q&A mode for real-time individual, group and peer assessment in a fun and engaging game show style. Quick surveys can be done with the whole class as part of a plenary, with students automatically grouped based on responses. Finally, it includes a full Testing console with auto-marking for more structured assessments.
- **Collaborate:** From group leaders, group chat sessions, interactive whiteboard, audio monitoring and more, the solution has been built with collaboration in mind. The Student Journal ensures a record of all relevant content from a lesson can be stored in a PDF file for the student to take away and review. From personal notes to recommended resources, screenshots, teacher notes, survey results and more, the journal is a great addition for each student.
- **Administer:** With a Tutor console, tablet apps for teaching assistants and software for every platform, ProCloud Classroom Management is a complete solution. A dedicated Technicians' Console allows network administrators to monitor all devices and systems across the school, and perform remote management when needed.

# Putting Teachers in Control

ProCloud Classroom Management is a part of ADTRAN's ProCloud portfolio of cloud-managed networking solutions, including ProCloud for Wi-Fi, Switches and Education. ProCloud allows organizations to transform their network and the way they do business. The solution is designed to seamlessly integrate with our award-winning ADTRAN Bluesocket vWLAN and ProCloud cloud-managed service.

The classroom management solution is a key component of ProCloud.EDU, providing a complete digital learning suite for educators who are looking for a managed network service with over the top services, including content filtering and classroom management software.

For more information on ProCloud, please visit [www.adtran.com/procloud](http://www.adtran.com/procloud).

## ORDERING INFORMATION

### ProCloud Classroom Management

ProCloud Classroom Management is orderable in a tiered pricing model. Licenses are available per device used in the classroom, whether it is iOS, Android, Chromebooks, Mac or Windows desktops. You must also order the corresponding maintenance part number at same time you order the license. Please contact your partner or ADTRAN salesperson for more information.

### Differentiators

- Cloud delivered, requiring no hardware or software
- Manage applications available on students' devices
- Create a virtual whiteboard
- Take a snapshot of student screens
- Conduct instant class surveys to increase student interaction
- Monitor entire class with student thumbnails
